OBJECTIVE

Cyber Security student pursuing a B.Tech in Computer Science and Engineering with hands-on experience in SOC operations, threat hunting, OSINT, vulnerability assessment, and digital forensics. As a Digital Forensics Intern at NCFL/IFSO Delhi Police, conducted cybercrime investigations using forensic tools and developed an automated Android data extraction tool for analysis. Skilled in penetration testing, networking, Linux, and Python, eager to contribute to security monitoring and incident response efforts.

EDUCATION

LAMRIN TECH SKILLS UNIVERSITY PUNJAB, SBS NAGAR, Punjab

Aug 2023 - Present

B.Tech, Computer Science and Engineering (Cyber Security)

SWAMI VIVEKANAND I C KHADDA, KUSHINAGAR

Apr 2019 - Mar 2021

INTERMEDIATE (12th)

EXPERIENCE

TDO Tech Educations Pvt. Ltd.

Aug 2025 - Sep 2025

Cyber Security

Delivered online Cyber Security training sessions covering theory and hands-on labs for students, improving practical Cyber security knowledge and skills.

- Developed and maintained virtual lab environments across Windows and Linux operating systems to support hands-on cybersecurity training sessions
- Monitored student activities during labs to identify and address potential configuration issues or security misconfigurations
- Collaborated with instructors to analyze lab results and improve curriculum based on common vulnerabilities and attack patterns

NCFL/IFSO Delhi Police

Sep 2025 - Present

Digital Forensics Internship

Conducted digital forensic investigations on Cyber Crime cases using forensic tools.

- Collected and preserved digital evidence from diverse operating systems, ensuring chain of custody and data integrity
- Analyzed forensic artifacts using specialized tools to identify indicators of compromise and reconstruct incident timelines
- Assisted in incident response by monitoring alerts, investigating suspicious activity, and escalating findings to senior analysts
- Participated in compliance checks and audit preparations to validate adherence to departmental security policies

PROJECTS

WHOAMI Analysis, DNS security recommendation

- Performed OSINT analysis of accounts, identifying exposure and footprint risks.

MOB-X

- Developed an automated tool to extract Android device data including calls, SMS, contacts, and file system for digital forensic analysis.

TECHNICAL SKILLS

- **Cybersecurity & Analytical Skills:** Cyber Security, Vulnerability Assessment, Digital Forensics, Penetration Testing, Android Forensics, Analytical Skills
- **Tools & Platforms:** ADB, Oxygen, FTK, Xray
- **Programming & Scripting:** Python
- **Systems & Networking:** Networking, Linux, Operating Systems Knowledge

CERTIFICATIONS

- **Career Essentials in Cyber Security:** Microsoft and LinkedIn
- **Intro to Dark Web Anonymity & Cryptocurrency:** EC Council
- **Complete Ethical Hacking Course 2025:** Udemy
- **Computer Forensics and Digital Forensics Masterclass**

EXTRA-CURRICULAR ACTIVITIES

AIU (Association of University), Wushu

Feb 2024

Participant

IBM ICE (National Hackathon), GLA University, Mathura

Mar 2024

Hackathon

- Awarded as education excellence

Cyber Swipe

Aug 2024

Mini Cyberthon "Hack The Future"

- Organized a Cyber Security hackathon focused on Red Teaming and OSINT; maintained and secured project website and blog:
cyberswipe.in | blog.cyberswipe.in

Cyber Swipe

Sep 2025

Mini Hackathon “Hack The Future 2.0”

- Organized a 12-hour cybersecurity innovation marathon at Lamrin Tech Skills University, promoting collaboration and practical skill development.
